

PROFESSIONALEXPRIENCE

Full Stack Developer | Creasosphere Tech Pvt. Ltd. | Pune, Maharashtra

June 2025 – Present

Technologies: React.js, Django, PostgreSQL, Python, Postman, FAISS, HuggingFace Sentence Transformers, GPT-4o Mini

- Developed responsive and data-driven user interfaces using **React.js** for real-estate analytics and property insights.
- Built backend APIs using **Django** to manage request processing, business logic, and analytics workflows.
- Integrated frontend and backend services to ensure seamless API communication, response validation, and error handling.
- Implemented RESTful API workflows and performed API testing and debugging using **Postman**.
- Engineered a **K-Means clustering pipeline** for property grouping based on spatial and contextual attributes, applying **Elbow Method** and **Silhouette Score** for optimal performance.
- Built a **regression-based pricing model** using location, amenities, and road-type scoring systems.
- Converted qualitative real-estate attributes into numerical datasets for analytical and predictive modeling.
- Contributed to a **Retrieval-Augmented Generation (RAG) pipeline** using **FAISS** and **HuggingFace Sentence Transformers**; integrated **GPT-4o Mini** for document-based natural language response generation.
- Streamlined code deployment processes and assisted in deploying applications on cloud platforms using **Docker**.
- Collaborated with cross-functional teams to gather requirements, design system architecture, and launch new features.
- Used **NodeJS**, ORM, and SQL/No-SQL to develop and manage databases.
- Conducted code reviews to ensure adherence to best practices and coding standards.

Android Development Intern | CODTECH IT SOLUTIONS

April 2025 – May 2025

Remote

Technologies: Kotlin, Jetpack Compose, Android Studio

- Developed an **Expense Tracker Android application** using **Kotlin** and **Jetpack Compose** with state-driven UI and navigation components.
- Implemented local data storage and expense management features to improve application usability and data handling.
- Designed responsive and user-friendly mobile interfaces following modern Android development practices.
- Debugged, tested, and optimized application performance using **Android Studio** development tools.
- **Technologies:** Kotlin, Jetpack Compose, Android Studio
- Developed user-friendly mobile applications using Java and Kotlin.
- Collaborated with cross-functional teams to gather project requirements and implement features.

SKILLS

Programming Languages: Python, Java, JavaScript

Frontend Technologies: React.js, Angular, HTML5, CSS3, Bootstrap

RESTful apis development

Web technologies: angularjs, jQuery, bootstrap

Databases: PostgreSQL, MySQL, Firebase

Git version control

Backend Technologies: Django, Django REST Framework (DRF), Node.js, Express.js

AI / GenAI Technologies: Retrieval-Augmented Generation (RAG), GPT-4o Integration, FAISS, HuggingFace Transformers, Sentence Transformers, Embedding Generation

Data Analytics & Machine Learning: K-Means Clustering, Regression Analysis, Data Preprocessing, Data Modeling

Cloud & DevOps: REST APIs, Render Deployment, Gunicorn, Docker (Learning)

Tools & Platforms: Git, GitHub, Postman, API Testing, System Design (Basic), Backend Architecture, MCP Server

Mobile Development: React Native

PROJECTS

Prasthan (Railway Management System)

Technologies: React Native, Node.js, Express.js, MySQL

GitHub: github.com/ravi-rkk/Prasthan-Train-management-system

- Developed a full-stack Railway Management System for train scheduling, booking, and ticket management.
- Implemented user features such as train search, booking, payment integration, and ticket handling.
- Built admin functionalities for managing schedules, routes, tickets, and user queries.

ReviewQuotes (Quotes & Review API Platform)

Technologies: Django, Django REST Framework (DRF), PostgreSQL, Gunicorn, Render

GitHub:

github.com/ravi-rkk/reviewqoutes

Live: reviewqoutes.onrender.com

- Developed a RESTful API platform for managing quotes and reviews using Django and DRF.
- Implemented CRUD operations, API validation, and backend error handling.
- Deployed the application on Render using Gunicorn with PostgreSQL integration.

EDUCATION

Post Graduate Diploma in Mobile Computing(C-DAC,Pune)

Feb 2025

Bachelor of Technology in Computer Science Engineering

Aug 2022

Dr. A.P.J. Abdul Kalam Technical University – Lucknow, India
